

Selecting and masking to move from one image to another

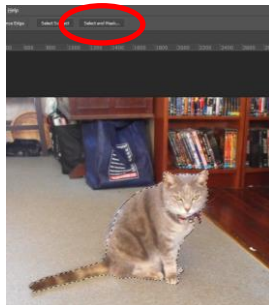

Open image

Quick Select Tool

Select Subject

Select and Mask

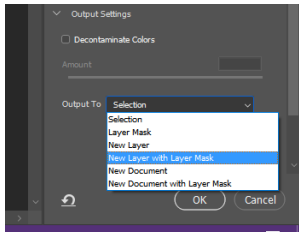

Ctrl+'+' to enlarge image on screen (Ctrl+'-' to make image smaller)

Refine Edge Tool

Use '[' to make brush small (use ']' to make brush bigger)

Trace around edge of selection to include fine hairs in selection

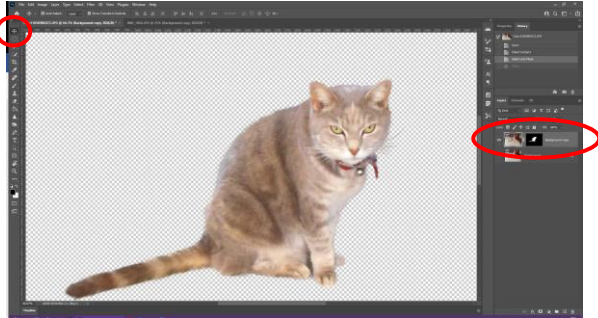

Output to

Click OK

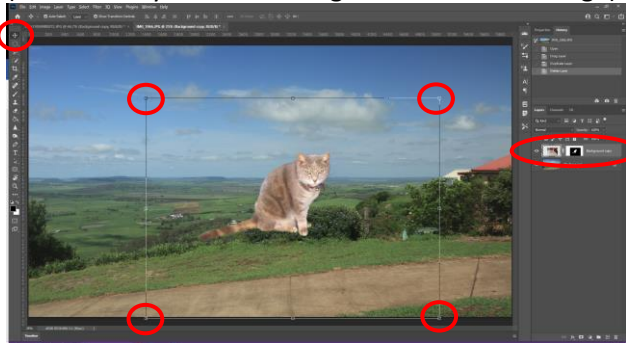

Open second image

With mask layer selected, drag and drop first image into second image

(alternatively Ctrl+C 1st image – Ctrl+V in 2nd image)

With 'move' tool selected, move to desired location and resize by dragging the corners up or down

Save as *.psd or *.tiff if you want to keep the layers to be able to rework later, or save as *.jpg when finished editing.
